

938H

Wheel Loader

Cat® C6.6 Engine with ACERT™ Technology

Gross Power (SAE J1995) 147 kW/200 hp

Net Power (ISO 9249) at 1800 rpm 134 kW/182 hp

Bucket Capacity 2.3 to 3.0 m³

Operating Weight 15 100 to 15 600 kg

938H Wheel Loader

H-Series Wheel Loaders – The New Standard For Midsize Loaders

Reliability and Durability

- Proven components and technology
- ✓ ■ ACERT Technology maintains performance, efficiency and durability while meeting emissions regulations
- Heavy duty components stand up to all operating conditions
- Strong, solid structures built to last
- ✓ ■ Diagnostic systems monitor product health to ensure reliability
- Unmatched parts availability and dealer support

pg. 4

Productivity and Versatility

- ✓ ■ Improved cycle times with Load-Sensing hydraulic system
- ✓ ■ Locking differentials provide superior tractive effort in poor underfoot conditions
- Constant net horsepower through the operating range
- Special machine arrangements for specialized applications
- Large variety of Cat® Work Tools

pg. 6

Performance you can feel with the capability to work in the most demanding applications. Unmatched operator comfort and efficiency in a world class cab. Revolutionary electronics and hydraulics for low-effort operation. Increased productivity with lower owning and operating costs.

✓ *New features*

Operator Comfort

- Easy entry and exit
- Excellent visibility
- Comfortable environment with controlled vibration
- Choice of steering and implement control systems

pg. 8

Serviceability

- ✓▪ Service centers for convenient maintenance
- ✓▪ Exceptional ground-level access to service points
- ✓▪ Monitoring systems and dealer support reduce unexpected downtime
- ✓▪ Cat Product Link giving you high-speed access to a world-class dealer service

pg. 10

Owning and Operating Cost

- Proven fuel efficiency
- Superior maintenance
- ✓▪ Electronic systems monitor product health and performance
- ✓▪ Engine idle management system
- Complete dealer support

pg. 12

Reliability and Durability

The Cat 938H – Built Strong and Tough – Tested And Proven – Ready To Work

- Validated components and technology
- Electronic systems monitor vital machine components
- Excellent uptime from the best dealer support network in the industry
- Unmatched genuine Cat parts availability

Proven Reliability. The 938H features many of the components designed and proven in various Caterpillar products – all contribute to the reliability of the 938H:

- Frames
- Axles
- Countershaft powershift transmission
- Individual component cooling system
- Cab

ACERT™ Technology. Since March 2003, ACERT Technology has been proving itself in on-highway trucks. More recently it has proven itself again in field tests of off-highway equipment. This technology allows Cat engines to meet durability and reliability expectations without sacrificing performance.

Engine Idle Management System.

The Engine Idle Management System (EIMS) maximizes fuel efficiency and provides flexibility in managing idle speeds for specific application requirements. Four controlled idle speeds are available.

Engine. The Cat C6.6 is a 6.6 liter displacement, in-line six cylinder engine. The C6.6 utilizes ACERT Technology, a series of Caterpillar engineered innovations that provides advanced electronic control, precise fuel delivery and refined air management, resulting in outstanding performance and lower emissions.

The C6.6 with ACERT Technology offers a compact design with big, heavy duty engine features for outstanding durability, reliability and performance. The C6.6 incorporates a new cross flow cylinder head design, 4 valve head and an ADEM A4 electronic controller. The C6.6 also features a proven cylinder block, pistons and crankshaft.

Electronic Control ADEM A4.

The Advanced Diesel Engine Management – Electronic Control Module consistently monitors important engine conditions and functions. It uses sensors throughout the engine to regulate fuel delivery and all other engine systems that require input to manage load and performance. The ADEM A4 controller is the brain behind engine responsiveness, self-diagnosis, controlling emissions and fuel economy.

Air Management. Air management is a key concept in optimizing engine performance and controlling emissions. Engines must breathe clean cool air in order to perform. To aid this, the C6.6 uses a turbocharger fitted with a smart waste gate to give precise and reliable control of the boost pressure. A new cross-flow design in the cylinder head facilitates air movement, while tighter tolerances between the piston and cylinder wall reduce blow by gases.

Fuel System. Through multiple injection fuel delivery, fuel is introduced in the combustion chamber in a number of precisely controlled microbursts. Injecting fuel in this way allows for precise shaping of the combustion cycle while reducing engine sound levels

Fuel Pump. The C6.6 uses an oil-lubricated high-pressure fuel pump to feed a common fuel rail. By using an oil-lubricated fuel pump, the C6.6 has been designed to be more tolerant of alternative fuels.

Powershift Transmission. The 938H continues to use powershift transmission technology proven on previous series. The countershaft powershift transmission features heavy-duty components to handle the toughest applications. Built-in electronic controls enhance productivity and durability.

Controlled Throttle Shifting. Control Throttle Shifting regulates engine speed during high-energy directional and gear changes for smoother shifting and longer component life.

Electronic Clutch Pressure Control. Electronic Clutch Pressure Control (ECPC) system modulates clutches individually to improve shift quality, component life and operator comfort. Adjustment is simplified with all solenoid valves externally mounted on top of the transmission housing.

Axles. The 938H axles are designed by Caterpillar for durability in all operating conditions. The front axle is rigidly mounted to the frame to support the weight of the wheel loader and withstand internal torque loads as well as external forces encountered throughout operation. The rear axle is designed to allow $\pm 12^\circ$ oscillation. All four wheels remain on the ground over uneven terrain providing excellent stability and traction.

Integrated Braking System. The Cat exclusive Integrated Braking System reduces axle oil temperatures and improves transmission neutralizer smoothness. IBS has a direct impact on durability of the axles and brakes especially in applications involving long distances and/or heavy braking.

- A** Downshift logic only
- B** Brake application initiated
- C** Self-adjusting transmission neutralization

Structures. The articulated frame design of the 938H features a durable plate engine frame and two plate loader tower that is robotically welded. Robotic welding creates frame joints with deep plate penetration welds and excellent fusion for maximum strength and durability.

Linkage. The 938H linkage is a single-tilt Z-bar design. Z-bar linkage generates excellent breakout force and good rack back angle for better bucket loading and load retention. Lift arms are solid steel, providing superior strength with an excellent front end viewing area. The proven design offers excellent dump clearance and reach.

Counterweight. The two-piece counterweight is integrated into the 938H design and provides added protection for the lights by incorporating them into the top of the structure.

Caterpillar Designed Components. Components used to build Cat Wheel Loaders are designed and manufactured to Caterpillar quality standards to ensure maximum performance even in extreme operating conditions.

Engine electronic control modules and sensors are completely sealed against moisture and dust. Deutsch connectors and electrical wire braiding ensure that electrical connections resist corrosion and premature wear.

Hoses are engineered and manufactured for high resistance to abrasion, excellent flexibility and easy installation and replacement.

Caterpillar® couplings use o-ring face seals to provide positive sealing for durable leak-free connections.

Heavy duty components reduce the risk of leaks, corrosion and premature wear, increasing uptime and helping to protect the environment.

Monitoring Programs. Monitoring product health is key to maintaining reliability of any equipment. Many programs are available on the 938H to help you track machine health.

Productivity and Versatility

Work Smart And Move More

- Hydraulics are easy to control with low effort
- Differential locks provide maximum traction in varying underfoot conditions
- Constant net horsepower across various applications
- Standard and optional features that maximize productivity

Load-Sensing Hydraulics.

The 938H features a Load-Sensing hydraulic system that supplies flow and pressure for the implements only upon demand, and only in the amounts necessary to perform the needed work thus providing a more efficient loader.

With the new S3PC Priority Proportional Pressure Compensation Valve, implement control is improved over the previous system – raise/lower and rack back/dump can be operated simultaneously.

Operators will notice enhanced ease of operation, more rimpull into the pile and a 16% increase in lift force.

Constant Net Horsepower. On many competitive machines, gross horsepower is constant, meaning that net engine power available for actual work will vary based on demands made from parasitic sources, such as air conditioning or cooling fans. The Cat C6.6 engine is electronically configured to provide constant net horsepower at full parasitic load enhancing productivity and improving fuel efficiency.

New! Differential Lock. Maximize productivity with the new hydraulic locking front differential. This standard feature provides operators with the confidence to maneuver through poor underfoot conditions with ‘on the fly’ engagement.

A Caterpillar exclusive, the optional automatic front/rear locking differential collects input from sensors throughout the loader and adapts tractive effort to meet operating requirements.

Countershaft Powershift Transmission.

The electronic countershaft powershift transmission with automatic shift capability is designed and built by Caterpillar. The very responsive, full-power speed and directional changes provide excellent cycle times and productivity.

Fuel Economy Mode. Match transmission shifting patterns to machine application requirements. The Fuel Economy Mode (within Messenger) provides operators with the ability to choose between three different shift modes in order to maximize shift quality and fuel efficiency.

Ride Control. The optional Ride Control System improves ride, performance and load retention when traveling over rough terrain. Operators gain confidence moving at higher speeds in load and carry operations decreasing cycle times and increasing productivity.

Variable Shift Control. Match transmission shifting patterns to machine application requirements. Variable Shift Control (VSC) improves shift quality and fuel efficiency in certain applications by allowing the transmission to upshift at lower engine RPMs.

1 Standard Universal Buckets.

These flat floor buckets, equipped with various Ground Engaging Tools, provide easier pile penetration, better fill factors and faster loading cycles; they are offered in a wide range of capacities and are recommended in all applications, except fulltime bank or rock loading. All buckets feature integral spill plates to prevent rear spillage, as well as, bottom and side wear plates for greater durability.

2 General Excavation Buckets.

Built to handle the toughest conditions, these slope floor buckets feature a well proven, shell-tine construction design that resists twisting and distortion and are excellent for bank and excavation applications. Bucket hinges are part of a structure that extends under the bucket shell to the cutting edge,

forming box sections. These structures act as protection against impact and twisting forces. All buckets have integral spill plates that prevent rear spillage, keeping material away from the linkage. Hardened weld-on rear wear plates protect the bottom of the bucket for greater durability. Bucket side plates are also reinforced in their lower portion with additional wear plates for longer life.

3 Universal Buckets with Back Grading Edge.

In this configuration, an additional full-width box-section profile with a wear edge is welded at the back of the bucket floor. The bucket base edge and the additional rear edge are at the same level, providing better grading capabilities. This bucket can be fitted with welded flush mounted adapters and tips still allowing excellent grading capability.

4 Quick Couplers. They provide unmatched versatility and allow one operator with one machine to perform a wide variety of tasks, resulting in greater machine performance and cost efficiency. Use the dedicated quick coupler actuation circuit (optional) to activate the quick coupler and change mechanical tools without leaving the cab. Having a dedicated circuit also leaves the third valve solely to actuate hydraulic tools without the need for diverter valves.

5 Pallet Forks (PS). Pallet forks are the ideal tools for handling a variety of materials.

Operator Comfort

Work Comfortably And Efficiently

- Comfortable operation
- Excellent visibility
- Easy entry and exit
- Low effort steering

Operating Environment. The 938H provides operators with a comfortable operating environment with generous storage space and excellent visibility.

Seat. The durable seat adjusts 6-ways to accommodate all sized operators. The seat features an automotive style lumbar support for maximum comfort. The Cat C-500 Series Comfort air-suspension seat is optional as is a heated backrest and seat cushion.

Visibility. The 938H offers excellent visibility to the front and rear of the machine. Distortion-free flat glass stretches to the floor of the cab for excellent visibility to the bucket. Wet-arm wipers on both front and back keep the windows clean in any condition.

Rear Vision Camera. An optional rear vision camera is available to clearly monitor movement behind the wheel loader.

Lighting Packages. In addition to the standard roading lights, optional lighting packages are available for low-light applications. Optional auxiliary halogen or High Intensity Discharge (HID) cab lights provide exceptional lighting for night work. A rotating beacon is available as a safety feature.

Implement Control Pod. The newly restyled implement pod provides superior comfort through the full length adjustable armrest. Standard transmission F-N-R switch allows operators to keep their hand on the implement control levers while making directional shifts. An optional joystick with integrated F-N-R switch is available and replaces the lift and tilt levers.

Steering. Caterpillar's low effort Load-Sensing steering directs power through the steering system only when needed. The new hand metering unit and priority valve provide operators with full steering and multi-function capability at low engine RPM's. The combined steering column and instrument panel tilt for maximum operator comfort.

Controls. Key machine controls are conveniently located within arms reach and allow better efficiency while minimizing operator fatigue. A variety of machine controls are also contained within the Messenger display. By accessing various menus, an operator can tailor the machine to fit operating style and application. For multi-shift operations, personalized settings for each operator can be established and stored for maximum uptime and comfort.

Entry and Exit. A ladder with aggressive tread pattern keeps debris build-up to a minimum. The ladder is at a 5° forward incline for easy entry and exit. The main cab door opens a full 180° and latches in place to allow safe navigation to the rear of the machine. The right side door opens 10°, or completely for secondary exit simply by pulling a pin. A full-length ladder on the right side facilitates safe exit if needed.

Serviceability

Easy To Maintain – Easy To Service.

- Grouped service points and sight gauges for easy daily maintenance
- Convenient access to engine compartment for excellent serviceability
- Swing-out grill and cooling cores for easy cleaning
- Electronic systems to monitor product health

New! Multi-Piece Axle. With the introduction of Caterpillar's new multi-piece axles, service brakes and final drives are located outboard and provide easy access when service is required.

Autolube. Reduce time spent on daily maintenance and downtime for unplanned repairs due to inadequate greasing with the optional Caterpillar Automatic Lubrication System. Precise lubrication of pins and bushings at specific intervals improves component wear and reduces ground contamination from excessive greasing.

Hydraulic Service Center. Transmission and hydraulic oil filters are located in the Hydraulic Service Center, behind the hinged, right-side access ladder. The hydraulic oil tank can be drained from this location using the access port.

Ground Level Grease Points. Grease fittings are grouped on the right side of the machine in two convenient locations thus facilitating easy lubrication of vital components throughout the machine.

Electric Service Center. A lockable compartment located just below the left side access platform contains key electrical components such as the remote jump-start receptacle, battery disconnect switch, circuit breakers and hood actuation switch. The maintenance free batteries are conveniently located under the Electric Service Center .

S•O•SSM Services. Keep minor repairs from becoming major ones and avoid complete failures. By regularly taking samples from the ports provided, your Cat dealer tracks wear of components and parts, oil performance, and oil condition and uses that data to predict wear-related problems before they happen. Often a simple adjustment or replacement of a part, based on S•O•S reports, can keep a small problem from turning into a major repair – allowing your machine to be running when you need it, not waiting in the shop for service. Sampling valves on the 938H allow quick access to engine, transmission and hydraulic oils for S•O•S analysis. Oil change intervals and other services can be optimized according to your work schedule, reducing downtime and managing expenses.

Brake Wear Indicators. Axles are equipped with standard brake wear indicators, allowing a technician to easily determine when it is necessary to service the brakes.

Sight Gauges. Well-protected, yet easily visible sight gauges for the transmission, hydraulic oil and radiator coolant allow easy daily checks while reducing the risk of contaminants entering the systems.

Fuel Priming Pump. An electrical fuel priming pump is located between the fuel tank and the combined water separator/primary fuel filter. The electric priming pump eliminates the need to pre-fill or manually prime filters after a change, thus reducing contamination and improving injector life.

Cat Product Link. With Product Link customers and dealers can remotely obtain machine diagnostics. The system provides updates on service meter hours, machine health and equipment location.

Engine Compartment Access.

A single mechanical lift cylinder with manual back-up opens the hood. The tilting hood provides excellent

access to the engine and cooling compartments and if necessary, the entire hood can be removed with the built-in lift points.

Cooling System.

Cooling system access for clean-out and maintenance is outstanding. The perforated and corrugated grill minimizes debris build-up and swings out for easy cleaning and access to the cooling cores. The full-width air conditioning condenser and oil cooler cores swing out 45° to allow easy cleaning of the rear radiator face. An access panel located on the right side of the radiator support structure provides access to the front face of the radiator and ATAAC cores for easy cleaning.

Service Capabilities.

Cat field service technicians have the experience and tools necessary to service your loader on site. Field service trucks are fully loaded with state-of-the-art tools and diagnostic equipment as well as specifications and schematics for every Cat machine. Technical experts at the dealership and Caterpillar are available to provide assistance to field service technicians when needed.

With the hood closed, quick checks of the engine oil level, coolant site gauge and air inlet indicator can be completed through the side service door.

Ecology Drains. Engine, transmission and hydraulic oils can be easily drained with standard-equipment ecology drains. An axle oil ecology drain is optional.

Remote Pressure Taps. Pressure taps for key systems are grouped and centrally located throughout the machine and help facilitate quick diagnostics.

Electric Priming Pump. An electric fuel priming pump located on the primary fuel filter base eliminates the need to pre-fill or manually prime filters after a change, eliminating engine contamination.

Owning and Operating Cost

The 938H – Best Value For Your Operation

- Sight gauges, grouped maintenance points, easy engine access, ecology drains, maintenance-free batteries – all simplify daily maintenance
- Electronic monitoring systems track product health to avoid unscheduled costly repairs
- Unsurpassed parts availability reduces downtime
- Excellent resale value provided by genuine Cat quality, outstanding dealer service and unmatched dealer support programs
- Caterpillar Financial Services and Cat dealers understand your business

Engine Idle Management System.

The Engine Idle Management System (EIMS) maximizes fuel efficiency and provides flexibility in managing idle speeds for specific application requirements. Four controlled idle speeds are available.

- **Hibernate Mode.** Idle speed drops after a preset time to provide lower fuel consumption, reduced sound levels and lower emissions.
- **Work Mode.** Adjustable working idle speeds according to customer preference and operating conditions.
- **Warm-Up Mode.** Keep the engine at a consistent temperature in cold conditions.
- **Low Voltage Mode.** Prevent battery drain due to high electrical loads from attachments and accessories.

Maintenance. Proper maintenance of your wheel loader can help control expenses and lower your owning and operating costs. The 938H provides unmatched serviceability by offering:

- Hydraulic service center
- Electric service center
- Airborne debris-resistant, swing-out grill provides more efficient airflow
- Well-protected, easily visible sight gauges
- Ground level maintenance points
- Easy access to engine compartment
- Ecology drains for simple and clean fluid drainage
- Brake wear indicators for ease of inspection
- Maintenance-free batteries
- Extended oil and filter change intervals

Monitoring Systems. Monitoring product health simplifies maintenance planning and reduces costs.

Cat Product Link. With Product Link customers and dealers can remotely obtain machine diagnostics. The system provides updates on service meter hours, machine health and equipment location.

Cat Messenger. Messenger offers the comfort of providing real-time, visual feedback on engine and machine operating conditions. It displays information on diagnostic codes, maintenance and system parameters.

Cat EquipmentManager.

EquipmentManager uses key indicators from equipment such as hours, location and diagnostic codes and combines them with powerful tools like mapping, maintenance and repair scheduling as well as troubleshooting instructions. This application enables quick identification of actions required to maximize equipment uptime and control owning and operation costs.

Cat Machine Security System. Stolen equipment equates to lost production and increased costs. Eliminate machine theft and unauthorized usage with the Cat Machine Security System (MSS). MSS is integrated into the machine's electronic system and can protect most brands of equipment by requiring a uniquely coded key to start the machine.

S•O•S Services. Managing component life and machine availability decreases downtime while improving your productivity and efficiency. S•O•S Services can help you do that. Regular fluid sampling is used to track what is going on inside the equipment. Wear-related problems are predictable and easily and quickly repairable. Maintenance can be done according to your schedule, resulting in increased uptime and flexibility in maintenance and repair before failure.

Dealer Support. The Caterpillar global network of independently-owned dealers is the best in the world at providing support to keep your loader up and running. Known for parts availability and technical expertise, Cat dealers are partners in your business.

Parts Availability. Caterpillar provides an unsurpassed level of personalized service for your wheel loader. With parts distribution centers worldwide, most parts can be delivered in 24 hours. Easy access to parts reduces downtime.

Resale Value. Owning quality equipment is a very important factor in maintaining resale value. Cat not only supplies quality equipment but also provides product and dealer support to maintain the reliability and durability of your machine.

Customer Support Agreements. A Customer Support Agreement (CSA) is any arrangement between you and your Cat dealer that helps you lower your total cost per unit of production. CSAs are flexible, allowing them to be tailored to your business. They can range from simple Preventive Maintenance Kits to sophisticated Total Cost Performance Guarantees. Having a CSA with your Cat dealer allows you more time to do what you do best – run your business.

Caterpillar Equipment Training Solutions. A thorough understanding of machine systems and a high level of skill in operation helps achieve maximum efficiency and improves return on investment. Caterpillar Equipment Training Solutions programs help provide operators with high levels of proficiency and confidence. Contact your Cat Dealer for more information on Caterpillar Equipment Training Solutions programs.

Caterpillar Financial Services Corporation. Cat Financial understands your business, your industry and the challenges you face. That's why they can provide payment plans to fit your unique needs – and to help you achieve your goals.

Engine

Cat C6.6 with ACERT Technology

Gross Power 147 kW/200 hp

Net Power at 2100 rpm

ISO 9249 134 kW/182 hp

80/1269/EEC 134 kW/182 hp

Peak Torque (net) at 1400 rpm 840 Nm

Total Torque Rise 38%

Bore 105 mm

Stroke 127 mm

Displacement 6.6 liter

- All engine horsepower (hp) are metric including front page.
- EU Stage IIIA compliant
- Rating for net power advertised based on power available when the engine is equipped with alternator, air cleaner, muffler and on-demand hydraulic fan drive at maximum fan speed.

Operating Specifications

Operating Weight 15 500 kg

Static Tipping Load,

Full Turn 10 200 kg

Breakout Force 123 kN

Bucket Capacities 2.3 to 3.0 m³

- Operating weight with 2.8 m³ universal bucket and bolt-on cutting edge.

Axles

Front Fixed

Rear Oscillating ± 12°

Maximum Single-Wheel Rise and Fall 420 mm

Sound

Operator Sound

The dynamic operator sound pressure level measured according to ISO 6396:1992 is 73 dB(A) for a cab offered by Caterpillar, when properly installed, maintained and tested with doors and windows closed.

Exterior Sound

The European Union 2000/14/EC labeled exterior sound power level is 105 dB(A) for the machines certified to that requirement.

For the standard machine configuration, the sound power level is 109 dB(A) measured according to the dynamic test procedure and conditions specified in ISO 6395:1988.

Hydraulic System

Implement System

Pump Output 295 l/min

Hydraulic Cycle Times seconds

Raise 5.4

Dump 1.4

Lower, Empty, Float Down 2.7

Total 9.5

- Implement system, (standard) piston pump (rated at 2100 rpm and 70 bar)
- Cycle times with rated payload

Service Refill Capacities

Liters

Fuel Tank 247

Bucket Selection Guide

Standard Equipment

Standard equipment may vary. Consult your Caterpillar dealer for specifics.

Electrical

Alarm, back-up
Alternator (24 V, 65 A)
Ignition key start/stop switch
Lighting System:
 Four halogen working lights;
 two halogen roading lights
 with signals
Receptacle start (cables not included)
Starter, electric (heavy duty)
Switch, battery disconnect

Operator Environment

Beverage / lunchbox holders
Bucket / work tool function lockout
Cab ROPS/FOPS, pressurized and
 sound suppressed
Cab heater and defroster
Coat hook
Controls, lift and tilt functions
Electric horn, dual actuating:
 steering wheel and implement pod
Instrumentation, Gauges:
 Engine coolant temperature
 Fuel level
 Hydraulic oil temperature
 Speedometer, gear and service meter
 Tachometer
 Transmission oil temperature
Instrumentation, Warning Indicators:
 Brake charge pressure low
 Electrical system voltage low
 Engine oil pressure low
 Hydraulic oil filter bypass
 Parking brake applied
 Primary steering malfunction
 Transmission oil filter bypass
 Light, dome (cab)
 Messenger

Mirrors, rearview: internal and external
Power outlets; two 12 V, 5 A includes
 cigar lighter
Radio ready, includes antenna, speakers
 and converter 12 V, 5 A
Seat KAB (cloth) with mechanical
 suspension
Seat belt, retractable, (50 mm wide)
Steering column, tilting
Storage compartment
Sun Visor, Front
Switch, F-N-R (located on implement
 pod)
Wet-Arm windshield wipers; front and
 rear (interval functionality)
Window, Sliding (left and right side)

Power Train

Axle oil cooler ready
Brakes, full hydraulic enclosed wet-disc
 with Integrated Braking System (IBS)
Brake wear indicators
Differential Lock, Front Manual
Open Differential rear
Drive line, extreme service
Engine, Cat C6.6 with ACERT
 Technology and ATAAC
Fan, radiator, electronically driven,
 temperature sensing on demand
Filters, fuel, primary/secondary
Fuel priming pump (electric)
Fuel/Water separator
Monitoring System, axle oil
 temperature
Muffler, sound suppressed
Radiator, unit core with ATAAC
Starting aid (glow plugs)
Torque converter
Transmission neutralizer lockout
Transmission, countershaft, automatic
 power shift (4F/3R)
Variable Shift Control (VSC)

Other Standard Equipment

Counterweight
Fenders, Extension Platform Rear
Fenders, steel (front and rear)
Grill, airborne debris
Guards (bottom crankcase and
 fuel tank)
Hitch, drawbar with pin
Hood, 1-piece, non-metallic power
 tilting
Hoses, Caterpillar XT
Hydraulics, Load-Sensing
Kickout, lift, adjustable
Kickout, tilt, adjustable
Linkage, Z-Bar, crosstube/tilt lever
Oil sampling valves
Remote Diagnostic Pressure Taps
Sight Gauges: Engine coolant, hydraulic
 oil and transmission oil level
Steering, Load-Sensing
Vandalism protection caplocks

Tires, Rims, Wheels

A tire must be selected from the
mandatory attachments section. Base
machine price includes an allowance
based on a premium brand tire.

Antifreeze

Premixed 50% concentration extended
life coolant; freeze protection to -35 °C.

Optional Equipment

Optional equipment may vary. Consult your Caterpillar dealer for specifics.

Antifreeze, -50 °C
Autolube
Buckets and work tools
Bucket Ground Engaging Tools – see
Cat dealer for details
Camera, rear view
Cooler, axle oil
Differential Lock, automatic front and
rear
Drain, axle ecology
Ether Starting Aid
Fenders, roading
Guards, axle seal
Guard, front window, wide mesh
Guard, power train bolt-on
Guard, power train hinged
Guard, hitch area
Guard, front driveshaft
Guard, roading light, front and rear
Guard, tilt cylinder
Guard, transmission oil fill
Heater, engine coolant, 120 or 230 V
High Lift, three-valve
High Lift, three-valve with hydraulic
horizontal pin quick coupler

Hydraulics, three or four-valve
Joystick control, two, three or
four valve
Ladder, cable
Lights, auxiliary cab lights
Lights, high intensity discharge (HID)
Light, rotating beacon
Machine Security System
Mirrors, heated external
Open canopy
Precleaner , turbine
Precleaner , turbine/trash
Quick Coupler, hydraulic horizontal pin
Quick Coupler ready lines
Radio, AM/FM CD player
Ride Control
Seat, air suspension
Seat, heated air suspension
Seatbelt, 75 mm wide
Seatbelt, 75 mm wide (KAB)
Steering, secondary
Sunscreen, rear
Toolbox

Regional Package Europe

Certified 2000/14/EC Sound Power
required for EEC and EFTA applications
– Conversion CE (Secondary Steering,
Sound Suppression)
– Powertrain Guard, Bolt-on
– Front fenders, flat design
– Product Link
– Air Conditioning

Regional package AME/CIS

– Powertrain Guard, Bolt-on
– Precleaner, Turbine
– Front fenders, flat design
– Air Conditioning
– Cooling, High Ambient

938H Wheel Loader
